

Hamner Real Estate Adds Life Saving Equipment to Office!

Hamner Real Estate recently added lifesaving equipment to their portfolio: an Automated External Defibrillator. In partnership with Birmingham-based Cardiac Solutions, a world leader in public access defibrillator programs, Hamner Real Estate's Tuscaloosa office is now equipped with an AED. "Providing a safe environment for our team members and the customers who visit our office is one of my highest responsibilities. Our partnership with Cardiac Solutions has given us peace of mind knowing if anyone in our office suffers sudden cardiac arrest, we have a working AED ready to provide immediate assistance," said Jimmy Hamner.

Jon Seale, CEO of Cardiac Solutions, noted, "Mr. Hamner is setting an admirable example to other businesses by recognizing the importance of having an AED available to his employees and customers. We are thrilled to partner with Hamner Real Estate to provide this life saving equipment."

There are over 355,000 Sudden Cardiac Arrest deaths each year in the United States. Of those, nearly 15% occur in the workplace. Because SCA often occurs without warning, early defibrillation with an AED, coupled with effective CPR, can dramatically improve survival rates.
